DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-12, drawn to a sheet shaped optical package apparatus, classified in class 359, subclass 619 and 625.
 - II. Claims 13-18, drawn to a method of using a sheet shape optical element, classified in class 359, subclasses 619.
 - III. Claims 19-30, drawn to a device for and method of manufacturing a sheet shaped optical element package, classified in class 359, subclasses 619 and 625.
2. Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the product as claimed can be used a different manner.
3. Inventions II and III are related as process of making and process of using the product. The use as claimed cannot be practiced with a materially different product. Since the product is not allowable, restriction is proper between said method of making and method of using. The product claim will be examined along with the elected invention (MPEP § 806.05(i)).
4. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II or Group III and conversely the same holds and consequently, restriction for examination purposes as indicated is proper.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
